

JIMI HENDRIX/LIVE AT WOODSTOCK 200g 3LP & BONUS 7" LP BOX

It was thirty five years ago today when Jimi Hendrix took the stage to end what would arguably become the most famous Rock event in history. Who knew it would be around 9 am on the Monday morning after the event was to end on Sunday night. What we do know is that Jimi came to headline the show and did so with a great set albeit at least twelve hours later than anticipated. Yes, many people had already left but for those who stayed to see the world's greatest rock guitarist it must have been a fitting end to three days of memorable performances by Crosby Stills and Nash, Janis Joplin, Santana, The Greatful Dead, Creedence Clearwater Revival, The Who, Jefferson Airplane, The Band and a host of others. To commemorate that day and the spirit of what it has come to represent, Classic Records and Experience Hendrix would like to announce the 35th anniversary Jimi Hendrix at Woodstock deluxe LP Boxed Set which includes the legendary Hendrix performance on 3 LP's transferred from the original analog master tapes. Accompanying features include a 36 page booklet with rare photos, expanded essays and interviews with Eddie Kramer, Mitch Mitchell, Billy Cox and other band members present that last day in the Summer of Love. Also included is a bonus colored vinyl 7" single with "Izabella" and "Message to the Universe" recorded by Eddie Kramer at the Hit Factory the week after Woodstock with the same band by Eddie Kramer. This definitive package will undoubtedly become a collectors item in years to come and is a must have for all serious Hendrix fans - the King of Rock has never sounded better at Woodstock - well, unless you were there just outside Bethel, New York on August 18th 1969!
