

DONALD FAGEN/MORPH THE CAT (2LP)

Donald Fagen's newest release is now coming out on vinyl! This all-analog pressing was cut by Steve Hoffman and Kevin Grey on 180 Gram Virgin Vinyl! Mr. Fagen himself approved the test-pressings! This album is an audiophile project all the way: from the original recording to the mastering to the pressing—even the packaging! This Limited-Edition is one LP you will very sorry to miss!

Morph The Cat is the eagerly anticipated new solo album from Steely Dan co-founder Donald Fagen. His first solo album since 1993's Kamakiriad and the final installment in a musical trilogy that originally began with the release of The Nightfly in 1982.

Blending jazz, soul and a plethora of other musical influences with extended grooves and ever changing musical textures, Morph the Cat has already been compared to the Steely Dan classic Aja set in contemporary Manhattan.

1. Morph The Cat
